

EU UNIT

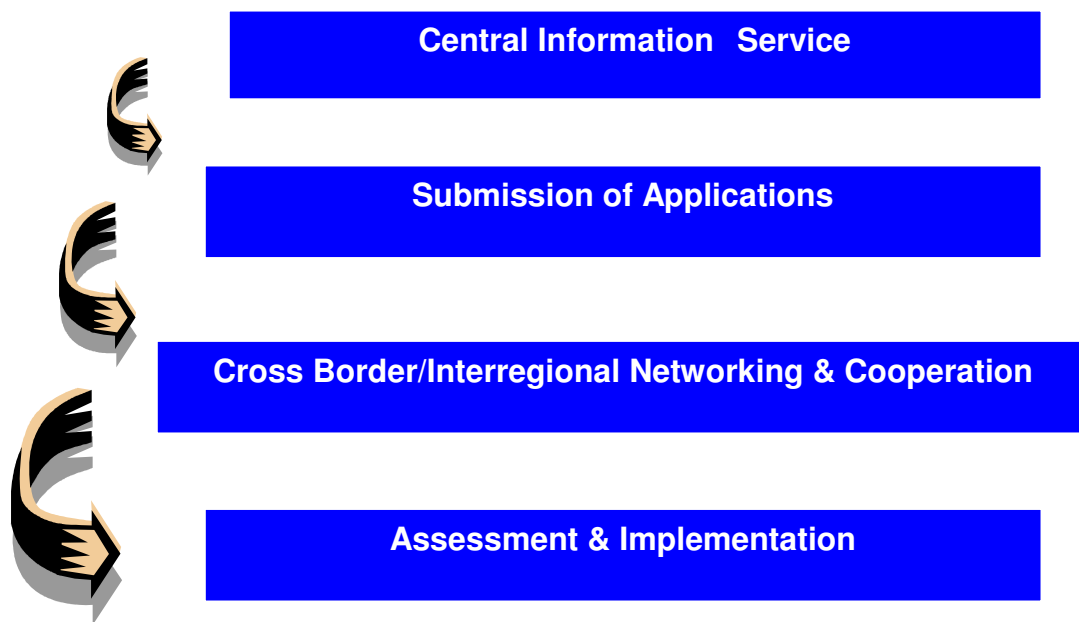

What We Do

The EU Policy and Funding Unit is a resource for all sections of Donegal County Council and works to draw down funding from the European Union. The Unit has two main Functions:

1. Developmental Function

This arm of the Unit sources funding opportunities and supports applications through all the stages of assessment that they must go through in order to be successful. To do this it offers four levels of support to the Council Directorates.

4 Levels of Support

Administrative Function

The Administrative Function's work begins when applications are successful, through providing necessary support to the projects that arise. It ensures that the Council complies with the all of the financial and administrative requirements of INTERREG IVA, IVB and other EU funding programmes.

The Administrative Function is currently providing support to a number of INTERREG Funded projects. For further information see "Current EU Funded Strategic Projects" section.
