

# propel

**ideas into businesses**

**You provide the idea... we'll provide  
office space, salary support, a mentor  
and all the business know-how you will  
need to make it a reality.**

**propel**  
ideas into businesses

 **ENTERPRISE  
IRELAND**

## **Are you developing a business in ICT?**

- Electronics, Software, ICT Services, Telecommunications

## **Or in the Life Sciences sector?**

- Biotechnologies, Pharmaceuticals, Medical Devices, Diagnostics, Medical Technologies, Analysis and Testing, Information and Communication Technologies for Life Sciences, Software and Consultancy Services

### **What will the Propel ICT/Life Sciences Programme provide for you:**

- Financial support of up to €15,000
- Best in class business start-up training
- Access to local and global contacts and networks
- Specialised business and industry expertise in 1:1 sessions
- Mentoring customised to your needs
- Access to potential investors

Enterprise Ireland is running a second Propel Programme with a focus on the Life Sciences and ICT Sectors. Propel is designed to provide ambitious entrepreneurs with the necessary commercial skills to establish a successful international business. Propel will run for 10 months and is open to entrepreneurs currently located in the Republic of Ireland.

The Propel Programme is also open to existing innovative companies in the early stages of development within these sectors that wish to internationalise and scale their business.

If you think you have the idea for an export focused business, or if you have a start-up business that you would like to “go global” with, then talk to us today. Places on this programme are limited, so enquire without delay. Final date for receipt of applications is the 23rd April 2010.

## **Propel can make this happen.**
